

### GEORGIAN RESULTS

DM High Voltage competed in Week One of the FRC competition season at the Georgian College event; this is the probably the hardest event to compete since there isn't much time to prepare after the bag and tag.

Team 2852 placed 5<sup>th</sup> overall with a quarter final finish and the Imagery Award. The team experienced some unforeseen issues during the competition. We chased an electrical issue, which caused our robot to stop unexpectedly; this led to a bad battery - go figure. That said, we are happy with our performance, and know our next steps to improve for the tournament in Waterloo.

**Thank you to all of our generous sponsors for supporting us**

### IMAGERY AWARD

Team 2852 was honored to receive the 'Imagery Award' at the Georgian College event. This award celebrates attractiveness in engineering and intriguing visual aesthetic integration between the machine and team appearance.

Throughout the competition DM High Voltage was loud and proud, supporting all teams on the field and in the pit. Our school colours electrified our presence, the sea of red made it easy to tell who we are. Great job marketing team; all your hard work paid off!

A shout out to Mrs. Weekes for all of her efforts in leading the charge for our team cheer and blitzing our Twitter page with posts!

### NEXT STEPS

To prepare for our next event, we have already started revisions to our robot to make it more stable and efficient to pick up and place the cubes on the scale and switch. Also, we haven't forgotten the climber; be ready for it!

### 2018 EVENTS

Our next competition will be at Waterloo University from March 22 - 24. This competition is open to the public and free for all spectators. Please come out and support us!

### TEAM 2852 HELPS

During the Georgian College event, we were able to assist Team 1325 in collecting school supplies for students in need. Below is our presentation to them.

### Tenth Anniversary Fun Fact!!

In the 2014 season, Aerial Assist, we finished as semi-finalists twice and won the "Industrial Design" award, at the Greater Toronto West Regional event.
